

D-MANNOSE PLUS

Supports Urinary Tract Health[◇]

D-Mannose is a natural sugar, which is minimally metabolized for energy, and does not stimulate insulin release. It is useful as a dietary supplement, especially when combined with cranberry extract which is a natural source of D-Mannose, as well as many other phytonutrients. Together, they help support healthy bladder and urinary tract function.[◇]

Native to North America, and a distant cousin to the European cowberry and huckleberry, the cranberry was recognized by Native Americans as a staple part of their diet. Today, cranberry-based products are enjoyed worldwide.

D-Mannose Plus is a quality nutritional supplement based on our proprietary D-C Complex™ (D-Mannose and Cranberry Extract), manufactured to high quality standards in an easy to use capsule form.
